Not sure what you want to do after high school? Need help with financing training or college? Not sure if college is right for you?

You may be thinking about a path which does not include a 4 year college. Remember there are many ways to reach your destination. Here are some options:

1. **Earn while you Learn:** In-demand career fields like healthcare and technology, construction and manufacturing provide opportunities to train you and pay you at the same time. These can also be traditional apprenticeship opportunities in the manufacturing or construction related fields. Follow QR Code and find the [Apprenticeship/Internship Resource page](#) section for more info.
2. **2 Year College/Trade School:** Students enter trade school or a community college to begin their studies and earn certificates for careers requiring short term training. Students will often go on to 4 year colleges from the community college.
3. **Military:** Many students choose a path in the military right after high school. Some want lifelong careers in the service while others use that opportunity to help them pay for college.
4. **Choose all of the above.** Some students will choose a little from each of the 4 options above to help them reach their career goals.

This image shows a single sheet of white, lined notebook paper. The paper has horizontal blue ruling lines spaced evenly down its length. A vertical red margin line runs parallel to the left edge. On the far left side, there are three circular punch holes, one near the top, middle, and bottom, indicating it was designed to be part of a binder or folder. The paper appears slightly aged or off-white.
